

Scaffold Logistics Quality Policy

Our policy at Scaffold Logistics is to promote, market, sell and hire our products/services in an ethical and professional manner throughout Australia and provide competitive financial returns to our investors on a continuing basis.

Scaffold Logistics Pty Ltd will document, implement, monitor and continuously improve the various business systems, processes, and service provision through input from employees, regular Management Review meetings and internal audits of our AS/NZS ISO: 9001-2015 Business Management System.

The Managing Director is responsible for the management of the QA Management System and for ensuring that company management are aware of all audit findings and resultant corrective/preventative action and material changes to the business processes.

The above framework allows us to improve our effectiveness in:

- Establishing a framework for developing and reviewing quality objectives.
- Ensure our product/service meets the current Australian Standards and Statutory Acts for which the product/service has been designed/supplied
- Ensure that hazards associated with the use and hire of scaffolding in the workplace are identified and risks to health and safety are assessed and controlled.
- Eliminate, or where this is not practicable, minimise risks to health and safety arising from the use and hire of scaffolding.
- Provide a safe working environment which promotes team work, innovation and training to enhance the skills of our staff.

It is Scaffold Logistics intention to encourage the personal commitment of all staff to the objectives of the BMS and to embrace the agreed working practices as part of their daily responsibilities.
